-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Specification*

1. The disclosure is objected to because of the following informalities: the cross-reference to related applications should be updated to indicate that the parent application is now an US Patent.

Appropriate correction is required.

2. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

### *Double Patenting*

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the “right to exclude” granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-20 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-21 of U.S. Patent No. 6,576,090. Although the

Art Unit: 1731

conflicting claims are not identical, they are not patentably distinct from each other because the present application claims the use of the deflection member of the US Patent and it would have been obvious to one of ordinary skill in the art to use the deflection member to imprint tissue. In other words, it would have been obvious to one of ordinary skill in the art to use the deflection member of the US Patent for its intended purpose. Note also that no restriction of the claims would have been possible if the method of making tissue, as claimed in the present application, and the deflection member, as claimed in the US Patent, were in the same application, i.e. no burden would have been put in examination process, since the deflection member is incorporated into the process claims.

#### ***Allowable Subject Matter***

3. Claims would be allowable if a terminal disclaimer in compliance with 37 C.F.R. 3.73(b) is filed.
4. The following is a statement of reasons for the indication of allowable subject matter: the prior art does not teach a method of making tissues using a deflection member as claimed. Specifically, the prior art fails to teach the extending portions of laterally extending from the plurality of bases and forming void spaces between the X-Y plane and the Suspended portions.

#### ***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure in the art of Method of Making Imprinted Tissues.”
